

IIT BOMBAY

A project of DIT, MCIT, Govt. of India at IIT Bombay and IISc

Organizing Committee

IIT Bombay

Prof. V. Ramgopal Rao
Prof. A. Q. Contractor
Prof. J. Vasi
Prof. Anil Kottantharayil

University of Cambridge, UK

Prof. Alan Windle
Prof. Mark Welland
Prof. Ashwin Seshia

**IWNMD 2010: 4th INUP Familiarization Workshop
“International Winter School on Nano-scale Materials and Devices”**

Dec. 13 – 17, 2010, IIT Bombay, India
Last Date for Registration: October 10, 2010
[Click here for more details about the workshop](#)

The “Indian Nanoelectronics Users’ Program” (INUP) announces and invites nominations for 4th INUP Familiarization Workshop: “International Winter School on Nano-scale Materials and Devices”, Dec 13-17, 2010 (IWNMD 2010). The [Nanoscience Centre at Cambridge University](#) and [Centre of Excellence in Nanoelectronics \(CEN\)](#), Indian Institute of Technology, Bombay, are jointly organizing IWNMD 2010 under INUP at IIT Bombay.

The INUP (<http://www.inup.org.in>, <http://www.inup-iitb.org>) provides support to the Indian Researchers for nanofabrication and characterization at CENs at IITB and IISc. The IWNMD 2010 would provide an intense academic experience including interactions with faculty from IIT Bombay and Cambridge University, UK, coupled with sharing of technology implementation experience in the field of nanoelectronics and would be focusing on nano-scale devices and materials.

The Heads of the departments of academic institutions are requested to nominate bright and highly motivated researchers (faculty/student (Masters/PhD)) working in the nano/microelectronics area. Limited financial assistance available for selected participants from academic institutions. The applicants will be short-listed by the INUP organizing committee and the selected candidates will be informed individually. The participants from government/private R&D organizations and industries are also invited to attend this workshop. However, no financial support is available for them. Faculty and PhD students working in the area of microelectronics/nanoelectronics will be given preference. Undergraduate students will be allowed to participate if seats are available.

Further, while selecting participants, preference will be given to those faculty members/students who are interested in implementing R&D projects under INUP at IIT Bombay/IISc Bangalore. Those who have already attended any of the INUP Workshops on Nanofabrication Technologies, held at IISc and IITB and have not submitted a R&D project under INUP to IITB/ IISc would be given the least priority. In addition to the lectures, hands-on training on nanofabrication/characterization will be conducted for the selected participants who would be executing their project at CEN, IITB under INUP. Around 30 participants will be selected for the hands-on training from the participants.

The financial assistance for the selected participants will be limited to travel by train, 3 tier AC (for students) or II AC (for faculty). Full local hospitality (food and accommodation) for the selected participants will be provided from the INUP funds.
